

PYTHON INTERN

Novostack is a premier digital transformation and product engineering company. We help our clients go through the smooth transformation of going digital by the use of agile methodologies.

- ❖ We are looking for a Python-Developer Intern to join our development team. You will learn and build highly responsive web applications that align with our business needs.

RESPONSIBILITIES:

- Work on a variety of software tasks and projects.
- Build Python applications, tools & API.
- Active participation in team development and design processes.
- Translate design documents into clean, extensible code.

REQUIREMENTS:

- Good problem-solving skills.
- Good understanding of Python.
- Understanding of object-oriented Python.
- Experience in Python Web Development.
- Basic understanding of any Python web framework (Flask, Django, FastAPI).
- Level of UNIX/LINUX understanding as needed to use tooling and implement applications.
- Good understanding of relational databases (Postgres, Mysql).
- Optional: Experience with AWS, Docker, HTML, CSS, and Javascript.

PERKS & BENEFITS:

- Letter of recommendation
- Pre-placement offers
- Flexible working hours
